A Note on the Name *Nephi*

John Gee

Over forty years ago, Hugh Nibley raised the issue of Book of Mormon onomastica: Are the “personal names contained in the story . . . satisfactory for that period and region”?² While an answer to the larger issue of all the names in the Book of Mormon still awaits investigation,³ we seem to be in a position to comment on the authenticity of the name Nephi, the first name to occur in the Book of Mormon (1 Nephi 1:1).

A Phoenician inscription discovered at Elephantine contains the name of a certain *KNPY*.⁴ This, by itself, is mere trivia., but the scholarly discussion of the name is of interest in connection with the Book of Mormon. F. L. Benz has compiled a list of the personal names in Phoenician inscriptions and their derivations. He sees the name *KNPY* as the Phoenician form of *KTMnfr.w*, an attested Egyptian name.⁵ This equation was later

confirmed by G. Vittmann, who added that the Aramaic spellings *KNWP^o* and *QNPY* were also attested.⁶ Further, the Aramaic *KNWPY* is attested in the Elephantine inscriptions.⁷ Vittmann also noted that the name ^a*H∞RNPY*, attested in Aramaic inscriptions, was probably Egyptian ^{nh}*©-hfr-nfr*.⁸ The name element *NPY* seems to be the Semitic (i.e., Aramaic, Phoenician) transcription of the Egyptian *nfr*, a common element of Egyptian personal names.⁹ The medial *p* in the Semitic form would have been taken as a *ff*, so the vocalization of *NPY* as Nephi poses no problem.¹⁰

While both *KTM-nfr.w* and ^{nh}*©-hfr-nfr* are attested Egyptian names containing the element *nfr*, *Nfr* itself is an attested Egyptian name.¹¹ At this time (fifth century B.C.) in Egypt, the final *r* had fallen out of the pronunciation of *nfr*,¹² and this remained the case in Coptic, where the form was

¹¹ It is attested as a man's name from Dynasty 1 through the late period (which Ranke takes as ending at the Alexandrian conquest of Egypt), and as a woman's name in the Old Kingdom through the New Kingdom, and the Greek period; Ranke, *Ägyptische Personennamen*, 1:194.

noufi.¹³ Though the name *KTM-nfr.w* has an /u/ vowel following the *n*, the verbal form of *nfr.w* is a stative (also known as a qualitative or old perfective), whereas *Nfr* is probably a participle; thus, the vowel was likely not the same. Demoticists indicate that the vowel following the *n* in the participial form of *nfr* as well as in the verbal form transcribed as *nTM-nfr* is an /ɛ/ (Coptic/Greek epsilon).¹⁴

With this we can make a guess at the pronunciation of the name *Nephi*. Most European and Latin American Latter-day Saints are already pronouncing the name more or less correctly as /nɛfi/ or /nefi/, since originally it was most likely pronounced “nẽfe” or “na fe” (rhyming with “heh fee/hay fee”) rather than the current “ne fĩ.” Nevertheless, the standard English pronunciation has a venerable history,¹⁵ and even this writer will probably continue to use it.

To sum up, *Nephi* is an attested Syro-Palestinian Semitic form of an attested Egyptian man’s name dating from the Late Period in Egypt. It is appropriate that *Nephi* notes early the connections between Egypt and Israel at his time (1 *Nephi* 1:3), for his own name is Egyptian. It is the proper form of a proper

¹⁵ Note the spelling of “Lehi” as “Lehigh” in M. J. Hubble’s interview of David Whitmer, 13 November 1886, in Lyndon W. Cook, ed., *David Whitmer Interviews: A Restoration Witness* (Provo, UT: Grandin, 1992), 210. Hubble was a non-Mormon and apparently had never seen the name spelled and thus spelled what he heard. As David Whitmer had “cut loose from [Joseph Smith and the Church] in 1837” (Cook, *David Whitmer Interviews*, 6) likely his pronunciation of the names had not altered from the initial period and thus the present American pronunciations of the names *Nephi* and *Lehi* were set within the first decade of the Church.
